Virgin Islands Issues Draft Minor Source Permit to Limetree Bay Terminals for Single Point Mooring

Project: The USVI Dep't. of Planning & Natural Resources issued a Draft Authority to Construct permit to Limetree Bay Terminals (LBT) for the construction of the Single Point Mooring, Marine Vapor Control and Capture system and a Thermal Oxidizer. LBT stated in its application to the DPNR that these changes will not be PSD applicable; this is consistent with the approach allowed in the recent "Project Emissions Accounting" Memo from the Administrator. As this is a PSD non-applicable permit action, we do not expect to review the LBT application sent to the VI DPNR.
